

Managed Patching & RMM Service

Proactive Care, Seamless Operations: Your IT, Always Updated and Monitored

Keep your IT environment secure, up to date, and running smoothly with Kick's Managed Patching & RMM service, powered by N-able N-central.

Combining proactive monitoring with automated patch management, it helps reduce risk and improve operational efficiency.

Features and benefits

- ✓ **Automated Patching:** Keep systems up to date and protected with critical updates.
- ✓ **Proactive Monitoring:** Identify and resolve issues before they impact users or operations.
- ✓ **Remote Management:** Securely access and support devices from anywhere.
- ✓ **Custom Reporting:** Gain visibility into system health, performance, and patch status.
- ✓ **Enhanced Security:** Reduce risk through continuous monitoring and regular updates.

Service offerings

- ✓ **Setup & Configuration:** Tailored deployment of N-able N-central to your IT environment.
- ✓ **Monitoring & Management:** Continuous monitoring and automated remediation.
- ✓ **Automated Patching:** Scheduled updates to improve security and uptime.
- ✓ **Third-Party Patching:** Coverage for 100+ commonly used applications.

Why choose Kick?

Kick combines Azure expertise with a consultancy-led approach to build strong foundations from day one. We design secure, well-governed environments that support real business outcomes, giving you clarity, control and a scalable platform.
