

# Cyber Essentials as a Service

## Build a stronger security foundations with Cyber Essentials

Cyber Essentials is a UK Government-backed certification scheme that helps organisations protect against common cyber threats and demonstrate that essential security controls are in place. Covering key areas such as firewalls, security updates, malware protection, user access controls and MFA, it provides a recognised framework for improving cyber resilience and building trust with customers, suppliers and stakeholders.

At Kick, we provide a fully managed service covering assessment, remediation support, submission and certification, guiding you through every stage of the process.

### Cyber Essentials

- ✓ **Reduce Cyber Risk:** Cyber Essentials helps organisations defend against common cyber threats by implementing essential security controls across users, devices and systems, reducing vulnerabilities and strengthening overall cyber resilience.
- ✓ **Build Trust & Confidence:** Achieving Cyber Essentials certification demonstrates your commitment to cyber security, providing assurance to customers, suppliers and stakeholders that recognised security standards are being followed.
- ✓ **Strengthen Security Foundations:** Cyber Essentials establishes a framework of security best practices, covering areas such as access controls, patch management, malware protection and secure configuration to support ongoing compliance and resilience.

Why choose Kick?

We combine cybersecurity expertise with practical business insight to help organisations strengthen security and reduce risk. Through assessment, remediation and certification support, we help you achieve Cyber Essentials with confidence.

## Cyber Essentials Plus

Cyber Essentials provides the foundation for protecting against common cyber threats, while Cyber Essentials Plus takes assurance a step further through independent technical verification. In addition to the benefits of Cyber Essentials, organisations gain verified proof that security controls are operating effectively, helping to strengthen trust, support tender requirements and demonstrate a higher standard of cyber security.

### More than Certification

#### Discovery & Assessment

We review your existing security controls, policies and processes to identify gaps and assess your readiness for Cyber Essentials certification.

---

#### Remediation Guidance

Our team provides practical recommendations and action plans to address vulnerabilities and align your organisation with certification requirements.

---

#### Certification Support

From submission through to certification, we guide you through every stage of the process, helping to ensure a smooth and successful outcome.

---

#### Enhanced Security

Beyond certification, we help strengthen your overall security posture by implementing best-practice controls that reduce risk and improve cyber resilience.

| Pricing     | CE    | CE Monthly | CE +  | CE + Monthly |
|-------------|-------|------------|-------|--------------|
| 0-249 Users | £2400 | £200       | £4500 | £375         |
| 250+ Users  | £3000 | £250       | £4800 | £400         |

### Cyber Essentials Readiness

Cyber Essentials requirements have evolved, placing greater emphasis on how organisations secure devices, user access, mobile technology and company data. Reviewing these areas in advance helps identify compliance gaps and ensure the necessary technical controls, policies and processes are in place for a smooth and successful certification or re-certification process.

#### Key Certification Requirements:

- ✓ Device and software patch management
- ✓ Multi-Factor Authentication (MFA)
- ✓ Security policies and user governance
- ✓ Mobile device and BYOD security
- ✓ User account and access management
- ✓ Supported operating systems and applications
- ✓ Asset inventory and device visibility
