## Unlock the Full Potential of Microsoft Azure with Ongoing Expert Guidance

Microsoft Azure is a leading cloud platform that enables organisations to host, manage and scale applications, data and IT services securely in the cloud.

Azure Consultancy as a Service (CaaS) provides ongoing access to a dedicated team of Azure specialists who work alongside your organisation to optimise, govern and secure your Azure environment. Through regular consultancy sessions and proactive engagement, we help you manage costs, improve performance, strengthen security and align your Azure platform with your business objectives.

Rather than relying on ad-hoc support, Azure CaaS delivers continuous expert guidance throughout the year, ensuring your Azure environment remains secure, efficient and ready to support future growth.

### Benefits of using Azure CaaS

- ✓ Optimise Azure costs and maximise return on investment.
- ✓ Strengthen security, governance and compliance.
- ✓ Improve platform performance and resilience.
- ✓ Access expert Azure guidance when you need it.
- ✓ Support business growth with strategic cloud planning.

Why choose Kick?

With a dedicated team of Azure consultants and technical specialists, Kick provides strategic guidance and proactive support to help organisations optimise, secure and maximise the value of their Microsoft Azure investment.

## Service offerings

### Health Checks

Regular Azure environment reviews for health and efficiency.

### Security Posture Management

Regular security reviews and remediations to maintain strong security posture.

### Small Works Requests

Delivery of minor changes without extra charges.

### Partner Liaison

Coordination with partners for Azure adjustments.
